COMPLETE WEBSITE REVAMP PROPOSAL

A World-Class Digital Presence for Ezentech

A NIBE-grade architecture — built to make Ezentech look like the manufacturer it already is.

PREPARED FOR

Ezentech India Pvt. Ltd.

OEM / ODM Air Conditioner Manufacturing

PREPARED BY

WebSpider Solutions

Delhi NCR • July 2026

Architecture modelled on nibe.eu, as requested. All figures in INR, exclusive of GST unless stated. Valid 30 days from issue.

1. The Revamp — In Short

This is not a refresh of the existing plan. It is a complete rebuild — a full corporate platform designed to make Ezentech look like the established, world-class manufacturer it already is. The reference is NIBE (nibe.eu): a manufacturer that presents itself with the calm, premium confidence of a global leader. We are building Ezentech that same kind of presence.

What makes this more than a brochure

Three things: a complete **Services & Capabilities** build-out (the core manufacturing offer plus every in-house component as its own page), a clean, premium **NIBE-grade architecture**, and an **SEO / GEO foundation** built in from the start so Ezentech is found in both Google and AI answers.

The result is a **focused 22-page platform** across six sections — comprehensive enough to answer every question a serious buyer will ask before they ever pick up the phone.

2. Modelled on NIBE — Adapted for Ezentech

NIBE's site works because its structure mirrors how a serious manufacturing buyer thinks. We have mapped each part of that structure onto Ezentech — keeping what makes NIBE credible, and adapting it for an OEM/ODM manufacturer rather than a consumer brand.

NIBE (nibe.eu)	Ezentech equivalent
Products (deep category tree)	Products + a full Services & Capabilities section (OEM/ODM, private label, in-house components)
Knowledge Bank	Knowledge & Insights — technical content, blog, news and case studies
About NIBE + prominent Sustainability	About Ezentech — company, manufacturing, and a combined Quality, Certifications & Sustainability page
Contact + NIBE Partners	A clean Contact & enquiry path
Calm, premium, single-brand design	The same confident, uncluttered feel — built for a manufacturer

Why this rebuild works

- **Credibility at first contact.** A polished, capability-led site makes Ezentech look like the established leader it is — the impression that wins a shortlist before a spec is even read.
- **Every capability found.** Dedicated pages mean buyers — and search engines — find each manufacturing service and in-house component instead of guessing at what Ezentech can do.
- **Built to convert.** A lean, focused structure guides every visitor toward one clear action: getting in touch.
- **Found everywhere.** An SEO and GEO/AEO foundation means Ezentech surfaces in both traditional search and AI answer engines — where competitors are barely present.

3. Complete Site Structure

Here is the entire platform laid out — every page we will build, grouped into its six sections, with a note on what each page covers. This is the full sitemap. Pricing follows in Section 5.

Scope: 22 pages across 6 sections. Responsive design (mobile / tablet / desktop) and written content are included on every page.

3.1 Homepage · 1 page

#	Page	What it covers
1	Homepage	Bespoke, cinematic motion-led hero; capability snapshot, trust proof and a clear path to enquire

3.2 About Ezentech · 4 pages

#	Page	What it covers
2	Get to Know Ezentech	Company story, 20-year legacy, scale, vision and what sets Ezentech apart
3	Manufacturing & Infrastructure	The four plants, 1M-unit capacity, automation and smart-factory capability
4	Quality, Certifications & Sustainability	Quality systems and standards, the certifications buyers require, plus energy efficiency and responsible-manufacturing / ESG commitments
5	Leadership & Our Journey	Leadership team, milestones timeline and the people behind the company

3.3 Services & Capabilities · 8 pages

#	Page	What it covers
6	Services Overview	The full capability map — manufacturing services and in-house components at a glance
7	OEM, ODM, Private Label & Contract Manufacturing	The complete manufacturing offer on one page: build-to-print OEM, in-house design-to-production ODM, white-label / private-label, and flexible volume contract manufacturing
8	Heat Exchanger Coils	In-house heat-exchanger coil manufacturing — specs, tolerances and capacity
9	Sheet Metal Fabrication	Precision sheet-metal components for AC units and beyond
10	Plastic Injection Moulding	In-house moulding for fascias, chassis and plastic components
11	Copper Tubing & Tooling	Copper tubing plus tool & die / tooling capability under one roof
12	R&D & Product Development	Product development, prototyping and the innovation pipeline
13	Testing & Quality Assurance	The NABL-accredited psychrometric lab and full testing protocols

3.4 Products · 5 pages

#	Page	What it covers
14	Products Overview	The complete AC product range, organised for easy navigation
15	Split Air Conditioners	Split AC range (1.0–2.5 TR), fixed and inverter, with specs and sheets
16	Window Air Conditioners	Window AC range with specifications and downloadable sheets
17	Inverter AC Range	Energy-efficient inverter range with specifications
18	Indoor & Outdoor Units (IDU/ODU)	IDU and ODU units and chassis options for brand partners

3.5 Knowledge & Insights · 3 pages

#	Page	What it covers
19	Insights, Blog & News	SEO/GEO content hub — article listing and template, plus company news and press
20	Technical Knowledge — How AC Manufacturing Works	Educational, authority-building technical explainers
21	Case Studies	Proof stories — partnerships and capabilities in action

3.6 Contact · 1 page

#	Page	What it covers
22	Contact Us	Locations, map, routing and an enquiry form

Levers to scale the count up or down

The page count drives the price, so it is easy to flex. To reduce: group the four **component pages** into one combined page. To expand: add product pages or bring back capability pages as needed. Nothing here is fixed — tell us the target and we'll re-cut it.

4. Pricing & Investment

Pricing model: homepage ₹4,000, every other page ₹1,500 (page copy included), plus a one-time content development & research cost of ₹8,000. GST applied at 18%.

Component	Amount
Homepage (1 page)	₹4,000
About Ezentech (4 pages)	₹6,000
Services & Capabilities (8 pages)	₹12,000
Products (5 pages)	₹7,500
Knowledge & Insights (3 pages)	₹4,500
Contact (1 page)	₹1,500
Pages — Subtotal (22 pages)	₹35,500
Content Development & Research (one-time)	₹8,000
Project Subtotal (ex-GST)	₹43,500
GST @ 18%	₹7,830
TOTAL PROJECT VALUE (incl. GST)	₹51,330

If a leaner launch is preferred

The full platform is **₹43,500 + GST**. A phase-one launch — the homepage plus the About, Services and Products essentials — can bring a strong presence live for less, with the remaining pages added as the site proves itself.

5. What's Included

- **Content on every page.** Human-written, buyer-focused, SEO-optimised copy — no generic AI tone. Included in each page price.
- **Responsive design.** Every page built for mobile, tablet and desktop — not billed separately.
- **SEO & GEO/AEO foundation.** Clean technical build, schema, metadata and AI-answer readiness across the site.
- **RFQ / enquiry engine.** A structured enquiry system that turns visits into qualified, sales-ready leads.
- **CMS + training.** Easy internal updates, with a handover session for the team.
- **Up to two rounds of revision** per page/design stage, plus 30 days of post-launch support.

Billed separately (if required)

- Hosting, SSL and annual maintenance (AMC) — quoted as a separate annual line.
- Paid stock/licensed assets, third-party plugin or subscription fees, and any ad spend.
- Professional translation / multilingual, if required later (the build ships in English).
- The ongoing digital-marketing retainer (SEO, LinkedIn, listings, ads) — covered in the Digital Growth Proposal.

6. Indicative Timeline

A focused platform of this size launches in roughly 8–10 weeks, dependent on content, assets and approval turnaround. A phased go-live (homepage and core sections first) can bring visibility forward.

Phase	Stage	Activities
Week 1–2	Discovery & Structure	Kickoff, sitemap sign-off, wireframes, content & keyword plan
Week 2–4	Design	Homepage + section templates, revisions, sign-off
Week 3–8	Build & Content	Development, copywriting across all pages, catalogue, enquiry form and content integration
Week 8–9	SEO, QA & Optimisation	Schema/GEO, Core Web Vitals, cross-device testing, analytics
Week 9–10	Launch	Go-live, indexing, Search Console submission, handover & training

7. Payment & Next Steps

Payment schedule

Milestone-based, tied to delivery. GST added on each invoice.

Stage	Milestone	Share	On project (ex-GST)
1	Advance — project kickoff	40%	₹17,400
2	Design sign-off	30%	₹13,050
3	Development / staging sign-off	20%	₹8,700
4	Go-live	10%	₹4,350

To proceed

- **Confirm the page scope** (full 22-page platform, or a phased launch).
- **Sign off the sitemap** — we issue a formal work order and kickoff schedule.
- **Advance payment** — discovery and design begin the same week.

The one-line case

A **₹43,500 + GST** platform that makes Ezentech look like the world-class manufacturer it is — built on the same clean architecture as one of the industry's most respected names. Every page costed, nothing hidden.
